(54) INFORMATION DISPLAY DEVICE

(57) Abstract:

PURPOSE: To realize the information display device able to display information inputted externally onto a television screen according to a pre-designated display schedule.

CONSTITUTION: The display device is provided with a memory 1 to store information inputted with at least a display desired date and time, a calendar timer 3 generating a time signal such as date and time, and a display circuit 7 synthesizing the information in the memory 1 and a television picture and displaying the result on a video display device 8 at a prescribed time based on the above display desired date and time. Since optional input information is displayed on a TV screen in a preset timing, the possibility of forgetting importance schedule and events or the like is precluded.
